Mathematical Biosciences

Mathematical Biosciences is abstracted or indexed in Applied Mechanics Review, Biological Abstracts, CABS/ Current Awareness in Biological Sciences, Chemical Abstracts, Current Contents, Engineering Index, Excerpta Medica, INSPEC, International Abstracts of Biological Sciences, Mathematical Reviews, and Medicus/ MEDLINE.

Volumes 177&178 May/June, 2002

Deterministic and Stochastic Modeling of Biointeraction

Foreword vii

E. Eller, Population extinction and recolonization in human demographic history 1

E. Pollak, Eigenvalue effective population numbers for populations that vary cyclically in size 11

J.-M. Naulin, A contribution of sparse matrices tools to matrix population model analysis 25

O. Angulo and J.C. López-Marcos, Numerical integration of autonomous and non-autonomous non-linear size-structured population models 39

J. Dyson, R. Villella-Bressan and G.F. Webb, Asynchronous exponential growth in an age structured population of proliferating and quiescent cells 73

G. Chiorino and M. Lupi, Variability in the timing of G_1/S transition 85

A. Bertuzzi, A. Fasano, A. Gandolfi and D. Marangi, Cell kinetics in tumour cords studied by a model with variable cell cycle length 103

J. Arino and J.-L. Gouzé, A size-structured, non-conservative ODE model of the chemostat 127

T.G. Müller, N. Noykova, M. Gyllenberg and J. Timmer, Parameter identification in dynamical models of anaerobic waste water treatment 147

M. Gyllenberg and T. Koski, Bayesian predictiveness, exchangeability and sufficientness in bacterial taxonomy 161

P. Auger, R. Bravo de la Parra, S. Morand and E. Sánchez, A predator–prey model with predators using hawk and dove tactics 185

B.W. Kooi, L.D.J. Kuijper, M.P. Boer and S.A.L.M. Kooijman, Numerical bifurcation analysis of a tri-trophic food web with omnivory 201

C.A. Braumann, Variable effort harvesting models in random environments: generalization to density-dependent noise intensities 229

(*Continued on last page of the issue*)

0025-5564(200205)177-178;1-5
